

Case Study

Implementation of M3

Functional Context & Requirement

- Taking a large manufacturing business group from fragmented enterprise applications to integrated, high-visibility ERP solution

Our Solution & Approach

- Deep process analysis and optimization followed by standardization in line with ERP processes
- Developed robust templates for rapidly rolling out implementations across group operations
- Careful design and planning of cutover to live
- Built to suite of ERP enhancing addons to ensure smooth process flow

Impact

- Total visibility of operations across group
- Enables accelerated business operations with over 100% performance improvement recorder for multiple entities
- Able to quickly adopt new business models – ‘Speed’ programs (reduction of order cycle from 60 to 12days)
