

Fortude Incident Reporting System

Report · Track · Analyze · Improve

FORTUDE

Better visibility with incident reporting system

The Fortude Incident Reporting System (IRS) can help businesses manage and analyze accidents, risks, process violations, occupational illnesses, and adverse environmental impacts, then leverage acquired information to continuously improve the performance of safety and health initiatives.

How can IRS help your business?

- Easy 5-step wizard to capture a wide range of incidents.
- Alert adverse events in real-time to relevant authorities
- Align with the developing ISO 45001 (standards)
- Minimize losses due to uncontrolled critical deficiencies
- Reduce time-consuming, paper-based work
- Identifying crucial incidents that require immediate actions
- Timely & informative responses to incidents at enterprise level
- Taking corrective actions based on the gathered data
- Ensuring corrective action addresses the root-cause

Workplace risks are real

The International Labor Organization stated

- Every 15 seconds a worker dies from a work-related accident or disease*
- 317 million accidents occur on the job annually*
- Economic burden of poor occupational health & safety practices is 4% of global Gross Domestic Product each year*

US Bureau of Labor Statistics stated

- 4,836 fatal workplace injuries**
- 16.9% incident rate of non-fatal occupational illnesses**
- 3,470,600 cases of non-fatal occupational injuries**

* International Labor Organization, 2014 ** US Bureau of Labor Statistics, 2015

The impact IRS has on your business

IRS customers have reported an increase in incident reporting of

32.2%

in 4 months

How does Fortude's IRS enhance the incident reporting process?

It creates a supportive environment for the organization's continuous safety improvement and analysis.

The wizard feature for incident reporting allows the user to complete the reporting process in 5 basic steps.

Ability to reduce time and cost to review incidents

The system allows recording actions against the incident root-cause to prevent any impending losses.

Provides a structured mechanism for reviewing reports and developing action plans.

System work-flow that guides and drives the users involved in the process through automated notifications and reminders and work-lists in the system.
