

Case Study

Implementing Infor M3 with PLM for a sportswear

The Client

Country: North Carolina, USA
Industry: Sportswear

Badger Sports is a national supplier of sports clothing to the US. The company also offers engineered fabrics in several styles. Its products are sold through team dealers, distributors, wholesalers, and online.

The Business Challenge

- Implement a multi-site, multi-warehouse ERP solution that can centralize operations across multiple locations with diverse product lines.
- Gather insights through product life cycles to make better business decisions.
- Create easily-accessible, custom reports.

About Fortude

Fortude is a global enterprise technology solutions partner providing ERP solutions, business intelligence, managed services and enterprise software development services. Fortude provides Apparel ERP technology solutions to manufacturers around the world and is a part of the single largest apparel exporter in Sri Lanka with over 40 locations across South Asia.

Our Solution & Approach

- Implemented Infor M3 & Infor
- Product Lifecycle Management (PLM) solution with the ability to handle large volumes of data.
- Embedded the ability to create custom reports to the PLM application.
- Developed custom integration points and pushed them via Infor Intelligent Open Network (ION) to M3 using custom MEC maps to support additional requirements.

Impact

- Centralized operations across multiple sites and warehouses.
- Seamlessly integrated Infor M3 ERP with PLM.
- The robust solution was able to support complex business challenges faced by the client.
- Significantly reduced time-to-market and the efficiency of material usage.
- Handled data migration loads of more than 650 styles, and 25,000 stock keeping units (SKU) and optimized the performance.
- Provided an intuitive interface for users to create custom reports.
