# Fortude Bartender Label Integration Solution

The Bartender is a comprehensive barcode designing and labeling software for creating, automating, and managing labels, packing slips, barcodes, and more. The tool helps improve safety, security, efficiency, and compliance by optimizing businesses' labeling, marking and printing processes.

The Fortude Bartender Label Integration Solution, which seamlessly integrates with Infor CloudSuite, includes an extensive label repository which covers most of the leading US retailers. The repository contains customer specific GS1 SSCC Labels, GTIN14 (SSCC14) Labels, Carton Content Labels, Packing slips and Price Labels.

As labeling is subject to different regulatory requirements in different industries across the globe, managing compliance becomes a challenge for businesses. With this solution, customers have access to a repository of pre-built labels and a proven robust solution.

## "Fortude has a label repository of 100+ customers in the US including Walmart, Amazon, Macy's, and TJ Max."

## Who is it for?

The Fortude Bartender Tool is ideal for brand owners and retailers who work with multiple customers who have different labelling requirements.

## Benefits

- A robust, easy-to-use deploy and pre-configured solution.

- Choose from over 100 customer-specific labels designed to match industry regulations and standard practices.

- A large repository of mostly commonly used shipping labels.

- Highly optimized solution that supports more complex businesses scenarios such as drop shipping and e-commerce sales.

- Easy to scale for new customers and can operate in very high volumes.
