

Fortude EDI Framework

Alliance
Partner

Connect quickly with large fashion retailers across the world, using a proven **M3 Electronic Data Interchange (EDI)** solution.

What is it?

A set of pre-built EDI connections for the fashion industry. The collection of over 100+ connectors include Amazon, Nordstrom and Target, covering **Order Cycle, Transportation/Logistics Management, Warehouse Fulfillment and Finance.**

Why do you need it?

- Integrate with the customer's business systems for real-time transaction updates
- Avoid redundant data entry and minimize errors
- Provide scalability to handle higher transaction volumes and quicker response
- Automate complex M3 processes such as transaction validation, and order splitting

Our EDI customers include
Fashion Traders, Manufacturers
and **Brand Owners**

Who is it for?

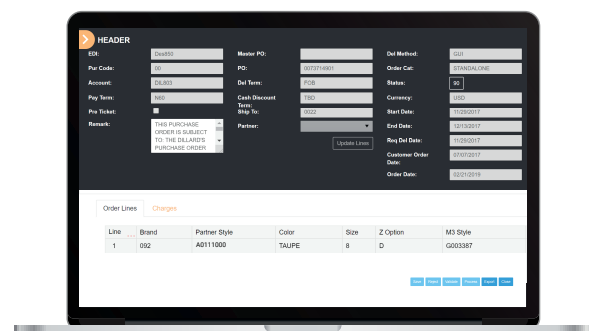

- Manufacturers, wholesalers, and distributors of fashion products
- Businesses trading with fashion retailers that use EDI
- Infor M3 ERP users

How does it work?

- Set up EDI operations between partners and M3, end-to-end
- Eliminate the need for mapping by drawing on the Fortude's map library
- Transform and validate M3 data
- Apply standardized and customer-specific rules

Specific features

- EDI Monitoring and Error Dashboard
- Automated EDI order submission in M3
- Version tracking EDI orders
- Item Catalog View
