# Streamline vendor collaboration for better business outcomes

The Fortude Vendor Portal provides Infor M3 and CloudSuite users the ability to empower their vendors to efficiently manage the preparation, packaging, and dispatch of orders by extending visibility over operations.

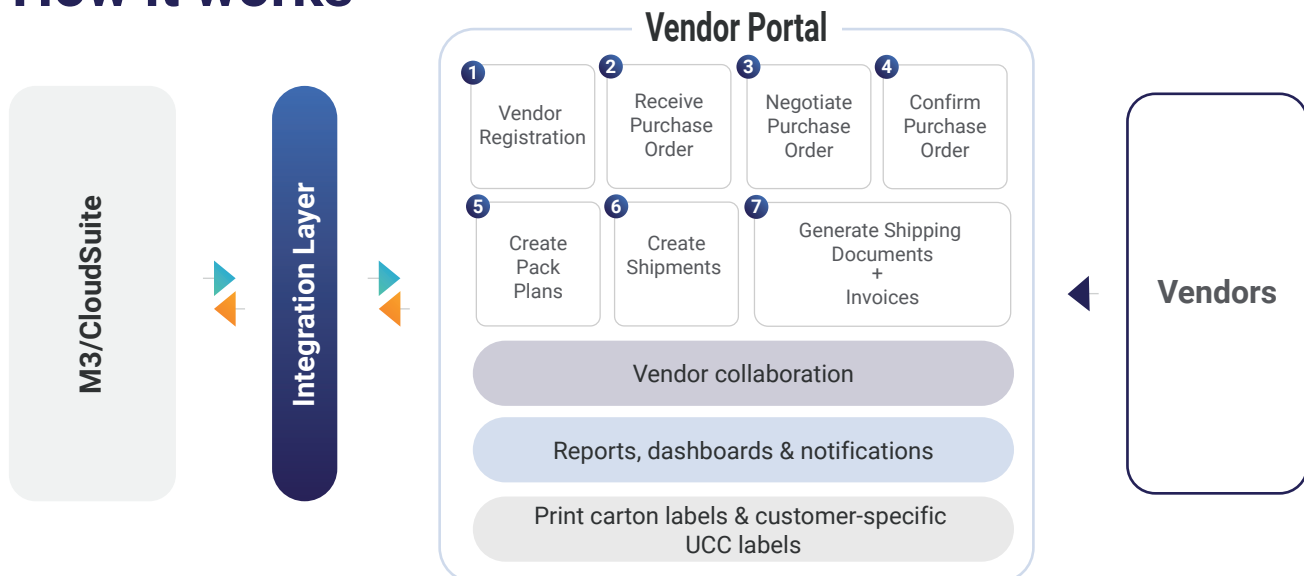

## Are you

- ❓ Inundated by a flood of vendor update emails and attachments?
- ❓ Affected by limited order growth because your vendor needs help with basics of delivery?
- ❓ Unable to provide accurate and timely updates to your vendors?
- ❓ In the dark about how your orders are progressing?

## The Vendor Portal can

- 📈 Seamlessly extend your M3/CloudSuite order processing capabilities to vendors and increase visibility of orders
- ⊗ Replace non-standardized, inefficient, and inaccurate communications with centralized information
- 📦 Scale up your orders and vendors with consistent and reliable processes

## How it works
