

Analytics Health Check

Navigating the path to data-driven decision making

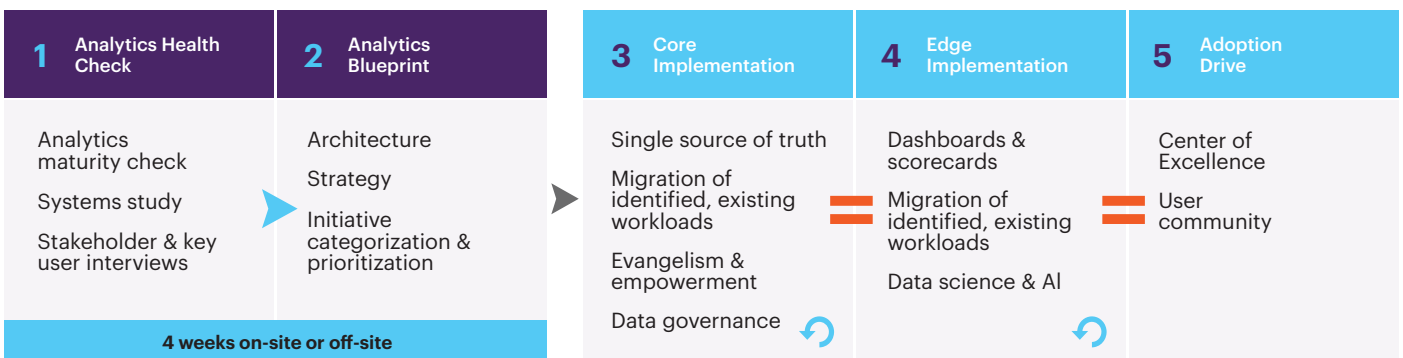

Intellint's comprehensive analytics health check is specifically designed to evaluate the state of analytics within your organization, regardless of its maturity level. This is aimed at helping you take the next step.

During the discovery, our team will,

1. Assess the current state of analytics landscape
2. Interview key stakeholders and identify the pain points.
3. Develop a detailed roadmap and a strategy for analytics transformation or improve the existing data architecture and relign to meet the current needs.
4. Identify the next steps and the scope of the pilot implementation

Approach

What wins will our analytics assessment score for you?

Strong foundation for developing an effective AI strategy

Cost savings on your analytics infrastructure and implementation expenses

Clear road map or the validation of an existing one with required changes

Value-based/phased implementation; Invest and progress based on outcomes

Faster decision making through access to real-time, accurate data

Select the right plan for your organization

Rapid Data Review/Quick Analysis	Deep Dive Analytics/Intensive Insights
🕒 5 days	🕒 10 days
<p>Understand organizational structure and functional capabilities</p> <hr/> <p>Evaluate current analytics/BI solutions</p> <hr/> <p>Review of source systems & data integration solutions</p> <hr/> <p>High-level roadmap and immediate next steps</p> <hr/>	<p>5 Days' Assessment package + Understanding of organizational data privacy and security policies</p> <hr/> <p>Dedicated time, as needed, to address concerns with key stakeholders and IT stakeholders</p> <hr/> <p>Recommendations & best practices</p> <hr/> <p>Detailed roadmap, high-level architecture, and next steps</p> <hr/>

Our Customers

“

Fortude's business intelligence platform has elevated our business through 360° visualization of operations and has helped to make swift data backed decisions. Not only are we saving time and resources; but our staff feel empowered to make various strategic decisions with data at their fingertips in real-time.
