

Fortude Managed Services

We manage your Infor ERP applications, so your business can focus on strategic business initiatives.

Are your IT teams fire-fighting Infor M3 related issues instead of spending time on other critical business areas?

Do you have repetitive Infor M3/CloudSuite challenges that constantly require fixing?

Are you spending extensive time on hiring, training and up-skilling key business users on Infor M3/CloudSuite?

Are your key users complaining about manual workarounds?

Fortude is a trusted Infor ERP application Managed Services Provider, working with customers around the world to help minimize complexities and focus better on business priorities.

Service Offerings

Application Managed Service

- Provide Level 2 incident resolution
- Manage the health of ERP through routine maintenance to help the business tap into the full benefits of the ERP solution
- Report technical incidents that arise, and propose suitable workarounds and solutions
- Analyze data related to recurring technical issues to identify root cause and proactively prevent recurrence

Resource Augmentation

- Access Fortude's pool of skilled Infor M3 Certified consultants when needed
- Right-size your workforce and fill experience gaps through temporary project management assistance for mini-programs and roll-outs
- Conduct solution reviews
- Augment training efforts for in-house resources so they can fully leverage the functionalities of your new ERP

Change Enablement

- Deploy solution enhancements to leverage full use of your ERP
- Release management practices that adhere to ITIL best practices
- Assess the needs of the business to recommend, build and maintain extensions that address unique processes

Why Fortude Managed Services

- Informative change management driven through ITIL best practices
- Guaranteed response times
- Driving business efficiencies with minimum disruption
- Continuous availability of specialized resources (consulting on-demand)
- Ensures Business IT teams can focus on strategic work
- Analytics and dashboards to support decision making

Our Customers

“We were struggling to find the right resources to support our M3 environment. We found Fortude and they delivered what was expected.”

Steve Madden

Fortude has helped one of the largest dairy manufacturers in Australia significantly reduce its recurring incidents.
