

Fortude Vendor Portal

Help your vendors onboard, collaborate, and fulfill orders, faster.

Fortude Vendor Portal enables Infor M3 and CloudSuite users to empower their vendors by extending visibility over operations. Vendors can now efficiently manage the preparation, packaging and dispatch of orders on a single interface.

Do you

- Have trouble scaling the growth of your orders because your vendor needs help with the basics of delivery?
- Struggle to provide accurate and timely updates to your customers and vendors?
- Lack transparency and visibility with the progress of your orders?

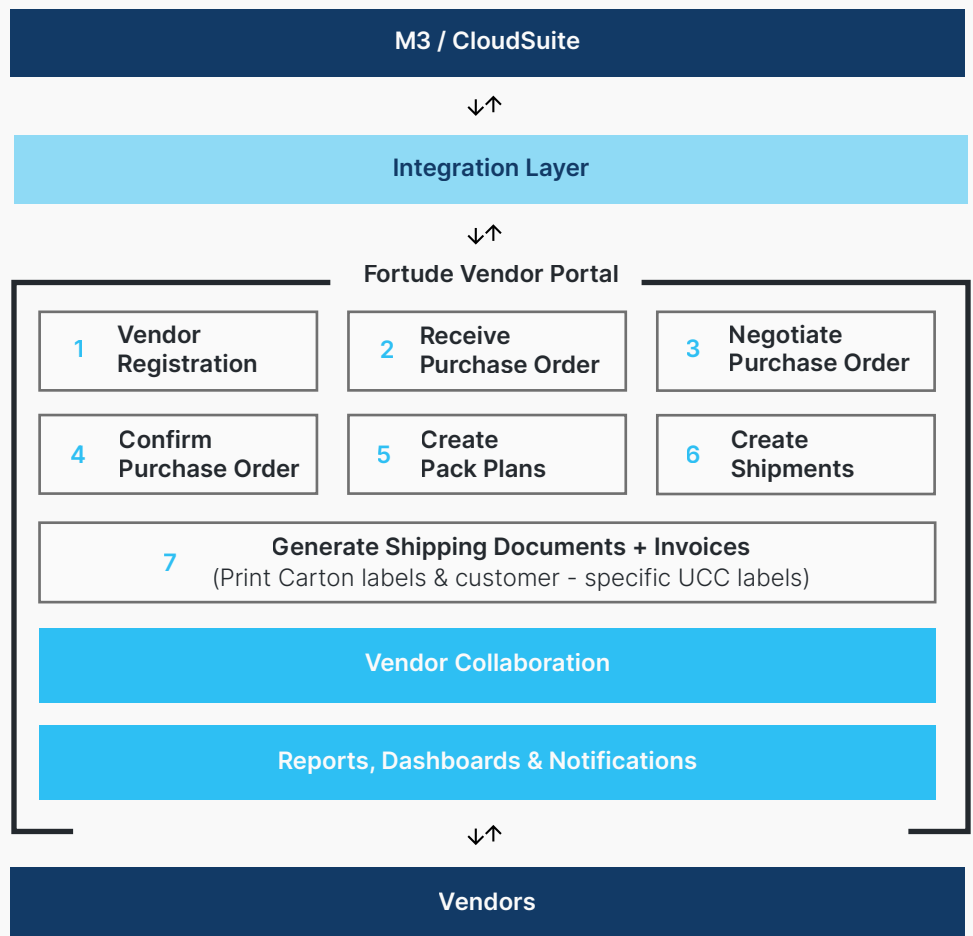

Fortude Vendor Portal can

- Seamlessly extend your M3/CloudSuite order processing capabilities to vendors and increase visibility of orders
- Replace non-standardized, inefficient, and inaccurate communications with centralized information
- Scale up your orders and vendors with consistent and reliable processes

How it works

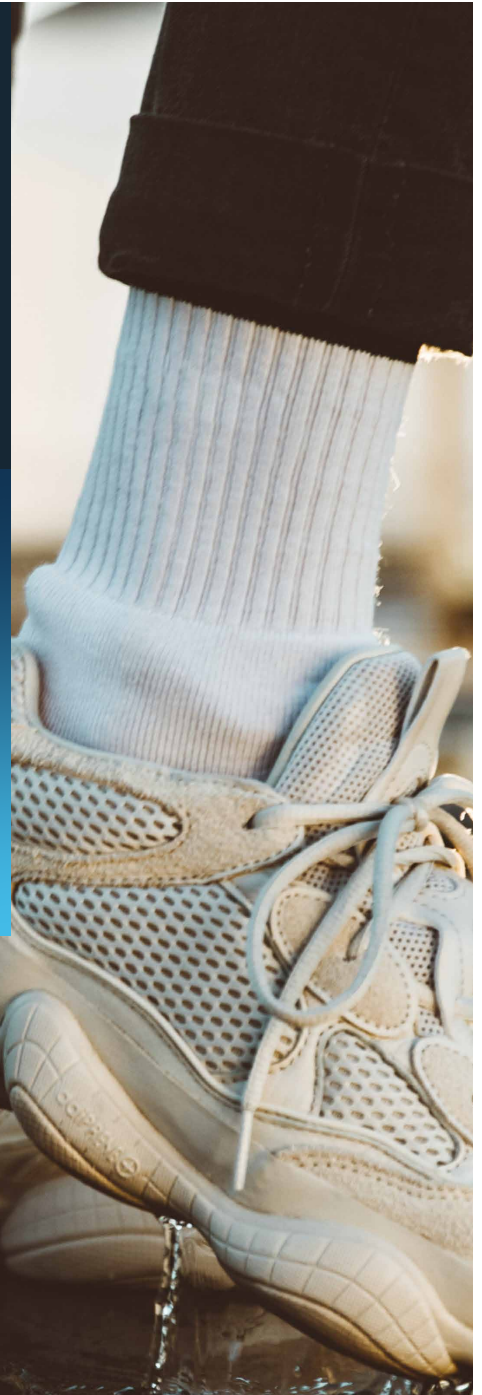

Premier US sock and legwear designer transforms vendor relationships with the Fortude Vendor Portal solution.

Reduction of offline communication & documentation
for shipping

Real time visibility
on container loading and shipments status at the point of dispatch

Real time integration
with core ERP and zero manual data processing across multiple systems

Eliminated manual vendor coordination,
freeing over 2 FTE resources to work on strategic activities
