

## Are you maximizing the value of your Azure cloud adoption?

Here's how the Microsoft-aligned Azure Cloud Adoption Framework (CAF) accelerated review can help.

### What is the Azure CAF Accelerated Review?

The Azure Cloud Adoption Framework (CAF) Accelerated Review is built on Microsoft's proven best-practice approach to planning, adopting and governing Azure.

Our Accelerated review applies this framework to your Azure environment to identify gaps and deliver a clear, actionable roadmap aligned to your business goals in just **three business days**.

### Common challenges we help address

**Unclear alignment between cloud strategy and business priorities.**

**Growing Azure environments without a defined roadmap.**

**Limited visibility into cost management and FinOps maturity.**

**Skills gap and unclear ownership across cloud teams.**

**Uncertainty around workload readiness, governance and security.**

## What the review evaluates

### 1. Cloud strategy

This evaluation identifies gaps between business objectives and cloud execution and validates whether your goals are clearly defined and achievable.

Key outputs include:

- A strategy gap assessment
- A business-driver alignment summary
- Validation of cloud mission and objectives

### 2. Technical readiness review

This highlights feasibility considerations, design risks and technical dependencies that may impact delivery.

Key outputs include:

- A digital estate snapshot
- A workload readiness summary
- Identification of cloud feasibility and design risks

### 3. Business outcomes & KPI alignment

This ensures cloud investments are tied to tangible value and supported by a clear performance framework.

Key outputs include:

- Clearly defined business outcomes
- A draft KPI framework
- A value realization baseline

### 4. Organizational & skills readiness review

We ensure your teams are equipped to support Azure adoption. This includes reviewing roles, responsibilities and training needs.

Key outputs include:

- A snapshot of the responsible, accountable, consulted and informed (RACI) parties
- A skills gap heatmap
- A recommended training and capability roadmap

### 5. Financial posture review

We evaluate your Azure financial model, cost governance and subscription structure to assess FinOps maturity. This helps identify immediate opportunities to improve cost visibility, control and optimization.

Key outputs include:

- A financial posture summary
- A cost management maturity rating
- Actionable FinOps quick wins

At the end of the assessment you will receive a clear report on **strategy, alignment and gaps**.

### Why Fortude?

Fortude is a global digital solutions provider that has earned the Analytics on Microsoft Azure specialization, along with the Digital & App Innovation (Azure) and Infrastructure designations, validating its deep analytics expertise and continued investment in its strategic partnership with Microsoft.

Get clarity on your **Azure journey today**.
